MORPACE UNVEILS NEW MOBILE SOLUTION FOR FLEET PROFESSIONALS AT GEOTAB CONNECT

FARMINGTON HILLS, MI – Morpace Inc. will unveil their new easy-to-use mobile solution, *DataDialogue*TM|*Pulse, Powered by Morpace*, designed for fleet professionals to improve corporate profitability, at Geotab Connect 2018, in Toronto, Canada, from June 11, 2018 to June 13, 2018.

Built to address today's critical trucking issues and data integration challenges, the DataDialogue|Pulse mobile app helps the fleet professional quickly extract and view actionable insights from the data they already own to better support the strategic fleet management decision-making process.

Combined with industry best practices, *DataDialogue|Pulse* harnesses near real-time vehicle data, which can be combined with driving event context, business operations data, and environmental data, to deliver:

- Actionable, near real-time KPI reports
- · At-risk vehicle push notifications
- Driving event contextual feedback
- Predictive analytics and models

To learn more, click <u>here</u>.

Geotab Connect 2018 will cover key fleet management industry topics and showcase the latest in technology with industry speakers, experts, and thought leaders who will share the newest trends, solutions, and real-world examples. Attendees will hear how open data and a rich ecosystem are transforming the telematics landscape, learn best practices in security, hear how telematics are benefitting smart cities and states, and how big data will change the way we manage fleets.
